Suntec Lime Sulphur contains polysulphides of calcium in the form of a soluble concentrate

Action
Lime Sulphur has contact action, and protectant action following conversion on drying to elemental sulphur.

Instructions for Use
Late Autumn, Winter, and Spring prior to budburst
All deciduous ornamental trees and shrubs
Apply 30ml per litre of spray at monthly intervals, as a dormant season clean up spray for scale insects, mites, lichen and fungal spores.
Follow with oil spray no sooner than 7 days after application

Precautions
Not for use on food producing plants
Lime Sulphur is alkaline, and of moderate toxicity
Do NOT mix with any other spray or fertiliser product
Do NOT apply to plants during active growth as leaf drop and plant damage may occur. Product stains on contact.

Warning
Lime Sulphur is damaging to eyes, irritates skin, and can cause serious internal damage if swallowed.
Wear eye and skin protection during application
Not to be taken. Keep out of reach of children
If swallowed seek urgent medical attention.
